PROFESSIONAL SUMMARY

MCA graduate (CGPA 8.52) with hands-on experience independently building production-grade full-stack web applications. Skilled in Python, Flask, MySQL, and OpenAI API integration. Developed an AI-powered support ticket system with GPT-4o-mini and role-based access control, and a complete Gym Management System during a 6-month full-stack internship. Seeking backend or full-stack developer roles in Chennai.

TECHNICAL SKILLS

Languages: Python, SQL, HTML, CSS, JavaScript

Frameworks: Flask, Bootstrap 5

Database: MySQL

Libraries: OpenAI SDK, ReportLab

Tools: Git, GitHub, Postman

Concepts: REST APIs, Role-Based Access Control (RBAC), OpenAI API Integration, bcrypt Authentication, SMTP Integration, Database Schema Design

INTERNSHIP EXPERIENCE

Full Stack Developer Intern | Dec 2024 – May 2025 (6 months)

Nucaza Innovations (OPC) Pvt. Ltd., Coimbatore

- Built a Gym Management System independently from scratch using Flask and MySQL, covering member onboarding, attendance tracking, and payment management across the full application lifecycle.
- Implemented secure user authentication with bcrypt password hashing and OTP-based password reset delivered via SMTP email integration.
- Designed RESTful API endpoints and MySQL database schema from scratch, independently making all backend architecture decisions.
- Automated PDF report generation for billing and membership summaries using the ReportLab library.

PROJECTS

SupportAI — AI-Powered Support Ticket System | Python, Flask, MySQL, OpenAI API, Bootstrap 5, ReportLab

github.com/Gowtham-vg/ai-support-ticket-system

- Built a multi-role ticket management system with separate dashboards for customers, agents, and admins using Flask Blueprints and MySQL.
- Integrated OpenAI GPT-4o-mini for automatic ticket classification (category and priority prediction) and AI-generated agent draft responses with graceful fallback handling.
- Implemented role-based access control (RBAC) with custom decorators; designed ticket state machine (open → in_progress → resolved → closed).
- Tracked AI token usage per API call via a dedicated audit log table; generated downloadable PDF reports using ReportLab and SMTP email notifications.

Gym Management System | Python, Flask, MySQL, ReportLab

github.com/Gowtham-vg/gym-management-system

- Full-stack web application for gym operations: member registration, monthly attendance tracking, fee collection records, and automated PDF billing reports.
- Security layer includes bcrypt-hashed passwords, OTP-based email recovery via SMTP, and session-based authentication protecting all private routes.
- On-demand PDF report generation using ReportLab for membership summaries and billing statements; codebase version-controlled with Git and hosted on GitHub.

EDUCATION

Master of Computer Applications (MCA) CGPA: 8.52 / 10

Gobi Arts & Science College, Gobichettipalayam, Tamil Nadu | 2023 – 2025

Bachelor of Science in Computer Science (BSc CS) CGPA: 7.8 / 10

Gobi Arts & Science College, Gobichettipalayam, Tamil Nadu | 2020 – 2023
